

E2DRIVER improves energy efficiency and saves costs in the automotive industry

The Horizon 2020 project E2DRIVER, managed by 12 partners from five EU countries, provides training in energy auditing and energy efficiency and encourages the implementation of energy efficiency standards in SMEs.

- Increase your energy savings by 20%
- Lower your financial expenditure
- Gain new skills in energy auditing and understand current energy issues

Get in touch with big energy players and enlarge your network to exploit new **opportunities** in the energy efficiency sector!

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847038.

HOW IT WORKS

- Incorporate **technical, behavioural and organisational** measures and boost energy efficiency
- Use the E2DRIVER platform for training materials adapted to **your personal needs and skills**
- Be part of a network of 40 companies from **Spain, Italy, France, Germany**

Be a part of the solution by helping create a community promoting smart energy use!

Energy and Financial Tools

Virtual Reality Modules

YOUR NEEDS COUNT

WHAT WE NEED FROM YOU

- Be an SME engaged in the manufacture of parts, electrical equipment, windows, car interiors, spare parts and other components.
- Have high energy consumption.
- Demonstrate commitment to lowering your energy footprint.
